

FACTSHEET

PRESS TEST PROCESS

STEP BY STEP TO YOUR BRIQUETTE SAMPLE.

RUF already carried out more than 10. 000 press tests. With the test process, we can check if your raw material is briquettable. We offer this service completely free of charge and non-binding, in order to propose your individual briquetting solution.

At the end you will receive a detailed press test report, pictures from the test and the produced briquette samples, if needed. We can send the briquette samples, so you can check the briquette quality. You are welcome to discuss and analyse the press test with your contact person from RUF/distributor.

ORGANISATION:

- ▶ Press test realisation only by registration/contacting RUF beforehand.
- ▶ Transport costs are paid by the customer.
- ▶ Small-scale tests, up to 50 kg, are free of charge
- ▶ In case of hazardous substances: Safety data sheets needed.
- ▶ Ensure weather-proof & leakproof shipment.
- ▶ Please attach delivery documents & enquiry form „press test“
- ▶ In individual cases (depending on material) costs can arise due to the waste disposal of the raw material. These costs are paid by the customer.
- ▶ If requested: We can send briquette- and emulsion samples to an analysis laboratory. These costs are paid by the customer.

If you are interested, please request our enquiry form for press test at info@brikettieren.de
Of course, we would be happy to answer open questions to your specific raw material.
